PROJECTS

students system
https://students-system-eta.vercel.app/
Full-stack web app built with Next.js, Tailwind CSS, Node.js, and MongoDB, enabling efficient student data management through secure CRUD operations and APIs.

E-commerce
https://e-commerce-git-main-moustafa-abas-projects.vercel.app/
A dynamic and responsive e-commerce application developed using React, Bootstrap, and Sass, with state management powered by the Redux Toolkit. The project integrates external APIs to fetch and display product data in real-time.

Quiz-app
https://quiz-app-gilt-delta.vercel.app/
A dynamic and responsive web application built using Next.js and Tailwind CSS. The project leverages local storage for persistent data management and integrates with external APIs to deliver real-time quiz content. The app is optimized for various devices.

My-portfolio
https://my-portfolio-three-peach-38.vercel.app
A responsive and visually appealing portfolio website created using React, Bootstrap, and Sass. This static project highlights personal and professional achievements and skills.

ATC-CARRIER
https://www.atc4ac.com/
A responsive static website designed for ATC-CARRIER , built using NEXT and Tailwind.

Community
https://elipso-project.vercel.app/
A static website designed for a community initiative, built using HTML, CSS, and Bootstrap. The project features a structured layout and aesthetic design, though it lacks responsive functionality.

Food
https://restaurant-kohl-tau.vercel.app
A static website designed for a restaurant, built using HTML, CSS, and Bootstrap. But does not include responsive features.

Car-Rental
https://car-rental-ashy.vercel.app
A static car rental website built using HTML and CSS, and Bootstrap. While not responsive.
